

## Notice of Retraction

# Retraction: An investigation into the chiropractic practice and communication of routine repetitive radiographic imaging for the location of postural misalignments

The article titled, “**An investigation into the chiropractic practice and communication of routine repetitive radiographic imaging for the location of postural misalignments,**”<sup>[1]</sup> published in the Journal of Clinical Imaging Science, is being retracted.

It was recently brought to the attention of the Editor in Chief that the article contains controversial statements regarding the commercial product Denneroll. Dr. Deed Harrison claimed that the data presented against this product lacks scientific backing. On investigation, the authors of the manuscript acknowledged the error. Therefore, on ethical grounds, the article is being retracted.

Dr. Vikram Dogra,  
Editor in Chief,  
Journal of Clinical Imaging Science.
